

BOOST YOUR CASH

Automate Your Credit Control

The problem of late payment

Cash flow is the heart of your business.

So if customers don't pay your invoices, this has a big impact.

Studies show that **the average business gets paid two weeks late**, regardless of whether you have 30 or 60-day terms on your invoices.

Late payment

Poor cash flow

Time spent chasing those outstanding debts

How do you solve this late payment issue?

Automating your credit control

Chasing up your late-paying customers eats into your business time.

Automated credit control apps solve your time and cash-flow issues.

Send tailored emails to your late-paying customers, as soon as their invoices are overdue – automatically.

And because YOU write the email templates, your emails still sound warm and human.

Boost your cash flow AND get back time

Credit control apps integrate seamlessly with your Xero online accounting software.

With Xero and automated credit control apps working in harmony, you're in total control of your cash flow.

- ✓ Automates your credit control processes
- ✓ Removes the time-consuming chasing of late invoices
- ✓ Gets you paid faster and more regularly
- ✓ Improves your income and boosts your cash-flow situation
- ✓ Gives you a brilliant overview of your aged debtors
- ✓ Helps you get in control of your finances

Make cloud software work for your business

Software does the hard work for you, reducing your aged debts and boosting your cash flow in the process.
